Kaniworks Design Studio

Chennai, India · working in US and European hours

A senior designer on your team, immediately.

Product design for software teams in the US and Europe: research, UX and UI, service design, design systems. Dedicated or project based, month to month. In short: a senior designer on your team as soon as you sign, live reviews in your hours, NDA and IP assignment as standard.

WHAT YOU GET

- Start immediately: your designer starts as soon as the paperwork is signed, with a two-week trial. Stop within the first ten working days and nothing is invoiced. Then month to month, 30 days' notice.
- Work delivered on a set rhythm: the work is in your Figma, with two live reviews a week at a time you pick and a short written note every working day.
- You own the work: NDA and IP assignment as standard, and a written scope and price before anything starts.

WAYS TO WORK WITH US · FROM-PRICES IN US DOLLARS

Reserved senior designer
from $5,500 a month
Full time, 40 hours a week on your work, delivered async. Half time from $3,000 a month.

Research study
from $3,900
8 to 10 interviews, journey map, findings and recommendations.

Project work
scoped within a week
A product, a feature set or a redesign, quoted after the first call.

WHY TRUST US WITH IT

- ✓ The studio is new; the people are not. The designer who leads it has 16+ years designing enterprise software for building-technology companies, a Red Dot Design Award (Product Design) and nine design patents.
- ✓ The same designer holds an M.Sc. in Psychology, is an HFI Certified UX Analyst, and has led a UX team of seven across six domains and eleven projects.
- ✓ Kaniworks designs and builds its own software, in production today: an ERP with live margins for fire-safety contractors, real-time fire alarm monitoring across four panel brands, and face-recognition visitor check-in in about 0.8 seconds. Every product has a live demo on kaniworks.in.
- ✓ Five case studies from the lead designer's career: field research with 30+ technicians across three countries, a service field study in Chennai, two operations concepts, and how a UX team of seven is run. All at kaniworks.in/design.
